
UI
UX
Design is not just what it looks like and feels like and
feels like design is how its work

WHAT DO UI AND UX MEAN?

- UI STANDS FOR USER INTERFACE
- UX STANDS FOR USER EXPERIENCE

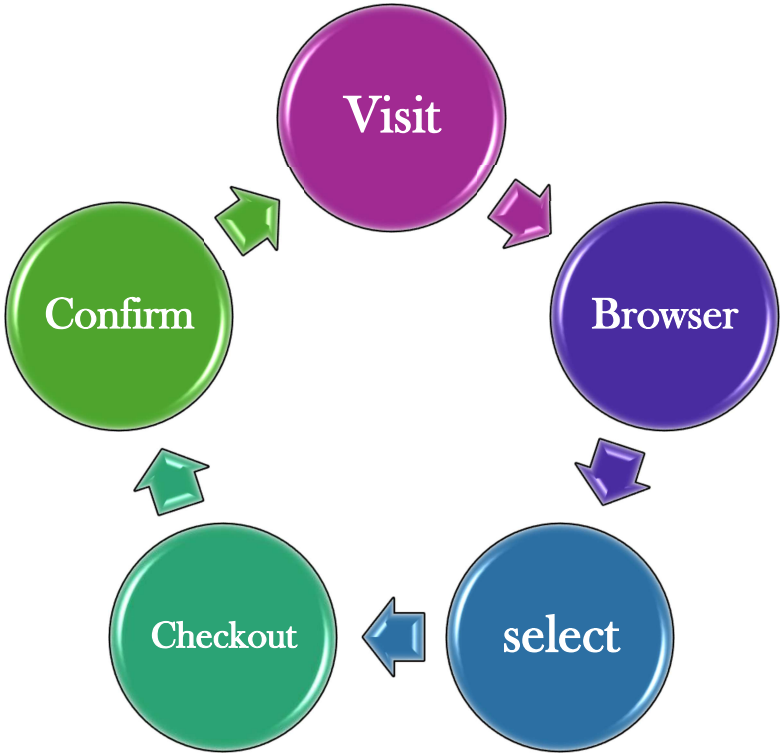

DIFFERENCE BETWEEN UI & UX

What is UI (User Interface) ?

Making the products user experience better means its simpler and more enjoyable to use which encourages people to use it more.

WHAT IS UX (USER EXPERIENCES)

Ux represents the overall feeling and ease of use when interacting with an object such as:-

- Accessibility, usability and task completion speed
- App performance, error handing and reliability
- Information architecture and task flow
- User research and understanding needs

6. YOUTUBE

UI & UX

> YouTube is a global platform for watching, sharing and creating videos.
